

Notice

To All Residents of Brockton Regarding Building Permits

Brockton's Building Dept. wishes to alert all residents and contractors planning to construct any type of structure within the limits of the Municipality of Brockton of possible delays in starting your construction projects. Please be advised that due to new legislation under the Conservation Authorities Act requiring increased setbacks from certain physical features a permit from Saugeen Valley Conservation Authority (SVCA) may be required in excess of 50 percent of building permit applications. SVCA is currently six (6) months behind reviewing applications and issuing permits in a regulated zone; by the spring of 2007 the delay may be even greater. Brockton's Building Dept. cannot issue any building permits that would contravene this new legislation. Any questions or concerns should be directed to Terry Tuck, Chief Building Official for the Municipality of Brockton at (519) 881-2223 or to Gary Senior, SVCA at (519) 364-1255.
