Walkerton Fire Department - Fire Extinguisher Facts

Only use fire extinguishers on small, contained fires. Never let the fire get between you and an exit. Most fire extinguishers empty in 30 seconds or less. If the fire is not out by then, leave immediately!

Remember the acronym **PASS**:

Pull the pin

Aim the nozzle at the base of the fire

Squeeze the trigger

Sweep the nozzle from side to side until it is empty

Check your extinguisher type. An ABC extinguisher is most common and is meant for trash, flammable liquids, and electrical fires. Using the wrong extinguisher could cause more harm than good.
